

## Вариант запросов В. Предметная область 7.

1. «Микросхема» и «Компьютер» связаны соотношением один-ко-многим. Выведите список всех компьютеров, у которых название производителя начинается с буквы «А», и микросхемы, которые в них установлены.
2. «Микросхема» и «Компьютер» связаны соотношением один-ко-многим. Выведите список компьютеров с наименьшим количеством ядер, отсортированный по минимальному числу ядер.
3. «Микросхема» и «Компьютер» связаны соотношением многие-ко-многим. Выведите список всех связанных компьютеров и микросхем, отсортированный по компьютерам, сортировка по микросхемам произвольная.
